Electra Enterprises

• Superior quality manufacturer of an array of sheet metal components for control panels, switchgears, acoustic enclosures and distribution panels. Cable trays, control panels.

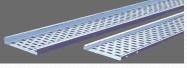

Corporate Mission

We aim to create value for our customers and aspire to be a preferred supplier in their vendors list by :

- Providing high quality products at the right price .
- Being responsive to their needs and requirement.
- Promoting integrity and ethical practices .
- Doing our bit for the environment .

About Us

Electra Enterprises is a professionally managed firm, founded in 1987, and engaged in manufacturing an array of sheet metal components for control panels, switchgears, acoustic enclosures and distribution panels. These are available in custom finishes as required by our clients. Complete assembly of Components based on customer requirement is also provided. The strength of the company lies in its Excellent manufacturing capabilities . Located on the Alandi Markal Road, the company's Infrastructure comprises of a state-of-the-art production facility. The unit is equipped with a modernised and completely computerised designing facility with a CNC Turret Punch press & CNC press break of AMADA make, a sophisticated Manual Control pre-treatment plant and a Batch type powder coating plant. The company also has a sophisticated fabrication unit and finishing Department that is fitted with the latest equipment for facilitating for designing and fabrication work. This spacious unit is manned by highly qualified professionals who manage all the production and fabrication activities with perfection. Our engineers. Our engineers and technicians have wide experience in building power distribution panels.

• Our USPs:

- Efficient design capabilities to undertake customisation .
- Highest quality assurance .
- Quick response and prompt action for customer concerns
- Accurate tolerance control to minimise yield loss.

Today Electra Enterprises is growing sheet metal company. Our expertise in electrical control panels is appreciated by our esteemed client and is helping us in establishing ourselves as a reliable supplier.

Products

1. LT Control Panel

- MCC Motor Control Center
- Motor Control Center (MCC) is also referred to as a motor control panel. These durable panels have powder coated sheet enclosures effectively designed to be used with motors offering sufficient protection from short circuit and overloads. Our specialization lies in manufacturing and assembling these MCCs as per the specifications provided by the customers at industry leading prices.

PCC - Power Control Center

The Power Control Centers (PCC) we offer have a high usage in power plants. We conduct rigorous quality checks on our products before delivering them to our clients. We offer a high range of power control centres up to 33 KVA in 3 different segments which are specifically developed to meet the needs of our client.

PLC

We offer precision made programmable Control (PLC) panels. These PLC panels are largely used for industrial automation and process automation. They are programmed through SCADA software and logic which is downloaded as per the process requirement.

Enclosures

we custom design various types of enclosures in a variety of material and specification dimensional measurement. Depending on our customer requirement we procure, assemble and fit components within the enclosures . We make sure that our products are fitted with approved quality materials; have proper insulation and coating for sound proofing .

Transformer Enclosures

Capacitor Banks (IP – 55 Standards)

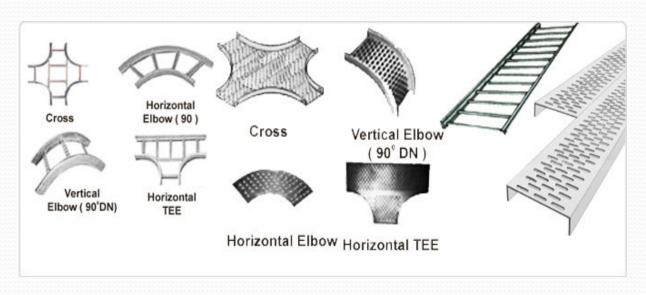

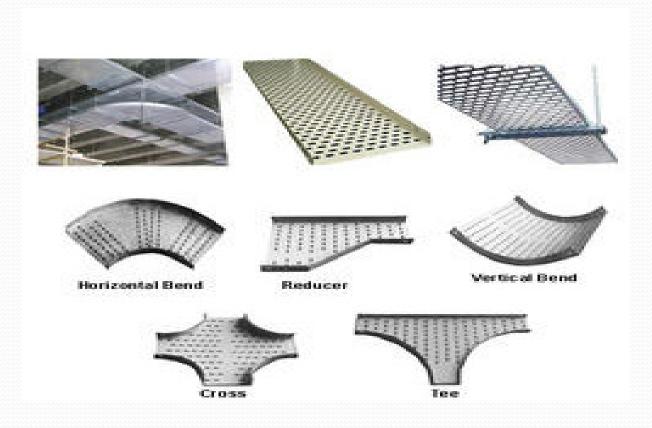

Distribution Box

We offer a wide range of distribution boxes meeting IP -65 standards. Each component undergoes thorough treatment in our 7 tank pre-treatment plant to ensure high **Quality**, **Reliability** and **Durability**

• Cable Trays :

Other Services

Design

Product Design and Engineering

Electra Enterprise engineers use the latest CAD/CAM technology to design and develop your parts . Complete process control documentation is then used with our computer – driven machine tools to provide maximum precision and efficiency

Fabrication

Fabrication Services including

Shearing, Punching, Bending, Forming, Hardware insertion, Drilling, Tapping, Counter-Sinking, Spot/MIG/TIGWelding, Grinding, Machining, Finishing and Electromechanical Assembly

•Pre - Treatment

Pre – Treatment

We provide pre-treatment in our state-of-the-art 7 Tank system. Multiple processes such as degreasing, derusting, phosphating and passivation are done. We also provide Zink Epoxy painting.

Powder Coating

Powder Coating

We provide the bighest quality powder coating in our Batch Type Plant. We believe our turn around times and high quality finish is second to none.

Assembly

Assembly and Packaging

From simple assemblies to complex finished products, Electra Enterprise can assemble and package your parts and products to meet your requirements.

Infrastructure

Spread across an area of 44,000 SQ.FT.in the industrial area of Pune, our manufacturing unit is well equipped with sophisticated machineries and division to carry out the complete production processes. The manufacturing processes are only carried out on Amada Machines for accuracy, standards and speed. We take great care on our manufacturing processes which enable us to supply high quality products to our demanding customers.

Equipment Listing

Sr. No.	Particulars & Specification	Make	Qty
1	CNC Turret Punching press (20 Ton) AE2510NT	Installed	1
2	CNC hydraulic break press (100 ton) RGM2 1003	Installed	1
3	Powder Coating Plant	Installed	1
4	Shearing Machine	Vimex	1
5	Bending Machine	Vimex	2
6	Power Perss		4
7	Busbar Punching ,Bending Machine		1
8	CO2 welding machine	Siddharth Arc	5
9	Arc welding machine	Siddharth Arc	2
10	Stud welding machine	Artech	1
11	Redial drilling machine	PSG	1
